

OH&S Planning and Instruction Document

Disclaimer

This Manual has been developed from a range of materials and sources and is intended as a guide to help managers of businesses develop an effective and efficient approach to managing OH&S related issues.

To make sure that you comply with all relevant Acts and Regulations, you should consult with the government department in your state that administers relevant OH&S legislation.

You should also consult with your workers compensation insurer to make sure any systems you develop comply with your policy requirements.

The Author is not liable for any damages or injury resulting from use of this Manual, the guidance provided by it or for any systems or procedures developed using this Manual as a resource.
